HEALTHCARE EQUIPMENT

# At last more time for patients. TOPIC takes the strain

The new MEIKO TOPIC is the perfect and cost-effective MEIKO cleaning and disinfection appliance to meet the hygiene requirements of patient utensils in care facilities.

Depending on the situation in the building, MEIKO TOPIC appliances can be supplied for wall-mounting so that they are clear of the floor or for installation directly on the floor. As care units complete with everything that is necessary and beneficial, TOPIC stand-alone appliances are specially designed for the rapid and uncomplicated replacement of out-dated cleaning and disinfection technology. They are modified to fit into the position of the old appliance whatever the make of the original – and to use the same connections.

We will work with you to develop an ergonomic sluice room design which meets the most stringent demands of cost-effectiveness, optimisation of work processes, safety in the workplace and hygiene. In this way you will receive your own solution customised to meet the hygiene standards you require.

The innovative TOPIC range of appliances works with rigorous efficiency to create painstaking cleanliness and disinfection, releasing nursing teams from this work so they can devote themselves to their real job – interaction with their patients.

*TOPIC* is sophisticated technology. Robust technology made from stainless steel which is the starting point for a long working life, easy cleaning and meticulous hygiene. Top design: the deep-drawn cleaning chamber is designed to be self-cleaning with no corners and sharp edges.

The water jet system is arranged to provide intensive cleaning, guaranteeing optimal hygiene for care utensils.

Bed pans, urine bottles, commode buckets etc. are automatically and reliably emptied, cleaned and disinfected. And always safely behind a sealed door, of course.

This means modern hygiene, convenience and a reduced work load for the entire nursing staff. The accountants can also breathe a sigh of relief – TOPIC's reliable, low maintenance technology makes only miserly demands on resources and budgets.

## Your TOP TEN: the *TOPIC* hygiene advantages

- Ideal operation as a result of the “One Touch”-operating system with large-sized membrane key-pads and unambiguous icons
- Hygiene security thanks to the  $A_0$  value control system complying with DIN EN ISO 15883
- Very economical due to reduced use of water, detergent and rinse agents
- Short, individually adjustable and effective program cycles
- Maximum flexibility provided by multi-functional brackets for care utensils
- Patented, steam-proof cleaning and disinfection system
- All-round cleaning by the powerjet system
- Electronic controls with versatile cleaning programs
- Hygiene security created by thermal disinfection
- Multiple uses from functionally efficient options and extensive accessories

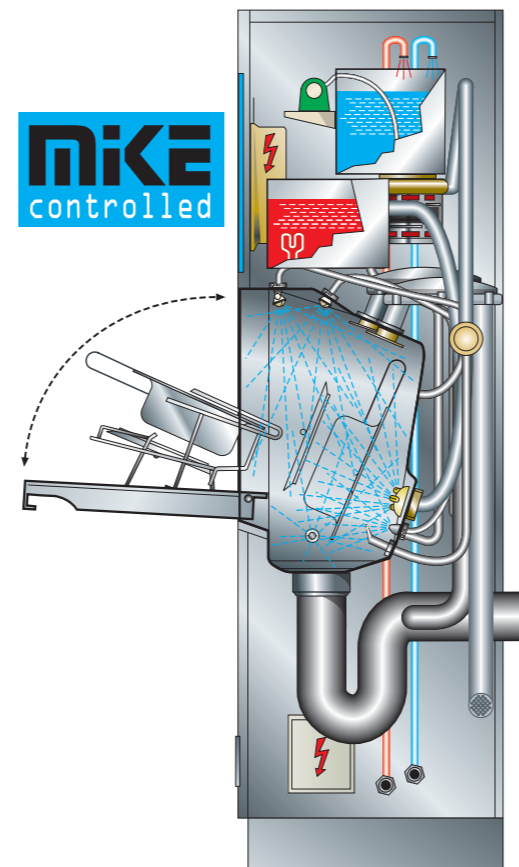

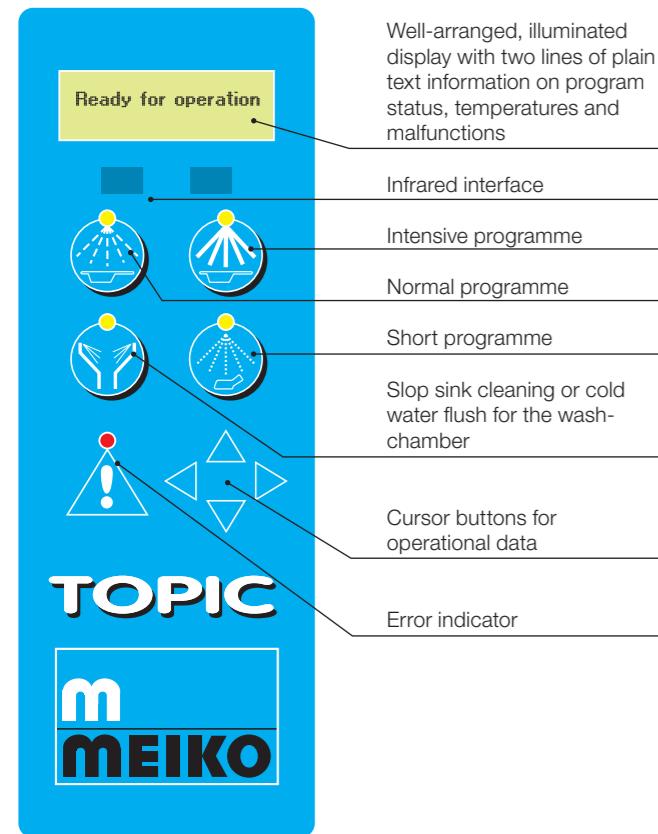

**TOPIC** suitable for every sluice room

**MEIKO Topic** single appliances - the rapid solution for renovation and modernisation projects

TOPIC cleaning and disinfection appliances provide maximum ease of operation. Starting the program, appliance control and operational analysis are all managed via the simple TOPIC membrane key-pad.

Simple "One Touch" technology and the innovative M-Commander analysis software help you to help your patients – only with TOPIC is patient care so simple and easy.

## MEIKO Topic 10 & Topic 20

### Everything plainly in view:

TOPIC with M-Commander and M-Commander W, the analysis software for MEIKO cleaning and disinfection appliances.
